Amazon.com: Customer reviews: Better, Faster, Lighter Java

Better, Faster, Lighter Java sounds the clarion call for better code writing, project management, and maintenance. The authors also include chapters on other open-source products, such as Hibernate and Spring, which can help keep the code clean and build projects using a container model like EJB without all the unnecessary overhead.

Python is a more productive language than Java. Python is an interpretive language which is accompanied by elegant syntax, and it makes an excellent choice for scripting and rapid application development in many areas.. It is a dynamically typed programming language. There is no need to declare variables. Whereas Java is a statically typed programming language in which variables have to be ...

map - Performance of traditional for loop vs Iterator ...

The last scenario illustrates how a long running query has a very negative impact in Java, but would barely be noticed by Node. Summing It Up. When it comes to real world scenarios seen in typical web applications, Node truly is faster and more scalable than Java. For web application development Node's performance is hard to beat.
