OEMs specify repair techniques in Structural Repair Manuals (SRMs) prepared for each aircraft. The SRM specifies scarf technique, repair materials, patch technique and cure profile, often with few alternatives and little latitude. "There's only a few places where we can stretch and be creative," says Campbell.

SRM - airtransport-manuals.cc

Usually this lay-up schedule is available in the Structural Repair Manual (SRM) or manufacturers component drawings. A technique often used to identify the lay-up schedule on large repairs is to cut away a small piece of the area to be repaired and remove the resin by burning; this leaves the fiber materials behind for easier identification.
