“Long term, Borsodchem is planning to stop importing aniline from Wanhua Chemical Group, but when exactly the producer will be self-sufficient is not clear,” sources say. The company usually carries out maintenance at its existing methylene di-para-phenylene isocyanate (MDI) and toluene diisocyanate (TDI) units during the summer months. The ...

Isocyanate - an overview | ScienceDirect Topics

Isocyanates, especially diisocyanates and polyisocyanates, are important monomers that undergo a broad range of chemical reactions. For example, they can react with compounds containing active hydrogen atoms, like amines, alcohols, mercaptanes, water, and carboxylic acids or they can react with themselves to form dimers (uretdiones) and trimers (isocyanurates) or they can be polymerized to polyisocyanates (N-substituted 1-nylons).
