Rich with reference tables ...

Many children in intensive care may not be getting ...

More than two-thirds of children who stay in intensive care for ≥ 28 days have an unfavorable outcome (moderate disability, severe disability, or death). Long-stay patients in pediatric intensive care utilized a large proportion of resources and this utilization has considerably increased with time. Service provision and policy making should expect worsening of these trends in the future; its effects on critical care bed availability and overall activity levels could be substantial.

Long-stay children in intensive care:

Long-term functional ...

This title is directed primarily towards health care professionals outside of the United States. The needs of critically ill children are unique and this handy pocket book will be invaluable to anyone who needs a quick account of intensive care procedures.
