Clinical Pharmacology Series Cardiovascular Clinical ...

Treatment of cardiovascular (CV) disease often requires the administration of numerous medications for long periods of time to patients likely to be old and suffering from a range of comorbid conditions. Rational prescribing informed by clinical pharmacology is essential if the right drug is to be administered to the right patient, at the right time, and for the right price.

CLINICAL PHARMACOLOGY. Atenolol is a beta 1-selective (cardioselective) beta-adrenergic receptor blocking agent without membrane stabilizing or intrinsic sympathomimetic (partial agonist) activities. This preferential effect is not absolute, however, and at higher doses, atenolol tablets inhibit beta 2-adrenoreceptors, chiefly located in the bronchial and vascular musculature.
