Isaac Newton's three laws of motion involve inertia, mass, velocity, and momentum. Key forces include gravity, friction, and magnetism. A force is required to do work, and generating a force requires energy. Energy can be stored as potential energy, or it can have kinetic energy—the energy of motion.

•A FOSS Force and Motion Resources book containing data and readings that are used throughout the course. Thirty-two copies of the full-color resources book come with the kit. They are intended to be used as classroom resources, shared by all students.

FORCE AND MOTION COURSE - Towson University

Force and Motion. Force and motion are fundamental to all matter in the universe and are integral parts of our daily lives. A force is a push or a pull on an object that is caused by an interaction with another object. Forces influence objects that are at rest or that are already in motion. Isaac Newton's three laws of motion describe how forces interact with objects to influence motion.
