Genes, Cells, and Brains - Penguin Random House

In their book *Genes, Cells, and Brains: The Promethean Promises of the New Biology*, Hilary and Steven Rose describe the way science has become the profiteers' playground in the new millennium. Their description of the last few decades of scientific progress in genomics, stem-cell research, and neuroscience is a sobering account of greed, fraud, and political cynicism that will dismay anyone who still thinks science is a disinterested quest for truth.
