AP Biology Graphing Practice Packet

Graphing Practice. Graphing Practice. Introduction. Graphing is an important procedure used by scientists to display the data that is collected during a controlled experiment. Line graphs must be constructed correctly to accurately portray the data collected. Many times the wrong construction of a graph detracts from the acceptance of an individual's hypothesis.

Data Analysis and Graphing Techniques Worksheet

Graphing is a fundamental "must-have" skill in a science class. These practice problems will provide your students with a solid foundation and/or review of the basics of constructing line graphs. Further, students will practice analyzing data and using graphs to make predictions. If applicable to yo...
