Handbook of Scheduling | Algorithms, Models, and ...

This work is the first handbook on scheduling algorithms, models, and performance analyses. It brings together chapters on the most recent topics within the scheduling field, and researchers from a broad range of backgrounds were sought in order to present an interdisciplinary approach to the subject matter.

CiteSeerX - Document Details (Isaac Councill, Lee Giles, Pradeep Teregowda): University timetabling problems can be classified into two main categories: course and examination timetabling. We discuss the problem statements and constraints for each of them and provide an overview of some recent research advances that have been made by the authors and members of their research team.
