Human Abilities | Taylor & Francis Group

In simplest terms, some scientists believe people behave as they do according to genetic predispositions or even "animal instincts," which is known as the "nature" theory of human behavior, while others believe people think and behave in certain ways because they are taught to do so. This is known as the "nurture" theory of human behavior.

human abilities their nature and measurement

“The Abilities of Man, their Nature and Measurement brings together the fruits of two decades of research into a coherent whole.” Human Nature Review 2003
The British psychologist, Charles Edward Spearman, was born in 1863 and died in 1945.

To properly inaugurate this series, scientific experts in this field were asked to reflect on various issues raised but not resolved in Charles Spearman's classic work, *The Abilities of Man: Their Nature and Measurement*, published in 1927.

Nature vs. Nurture: Genes or Environment?

Internal Validity: Measuring Spatial Abilities. The multifaceted nature of spatial abilities poses a challenge to identify and develop measures of the separate facets, as well as to understand their interrelationships. Since the early 1900s, researchers have sought evidence of a general spatial factor and its testable component parts.
