In areas where hog cholera is present, it is important that you vaccinate your herd. You should reduce visitors to the farm and not allow any pig meat near any pigs (this is a recommendation that should be followed regardless of the risk of disease). Any new pigs that you introduce to the farm should be quarantined.

As in most agricultural businesses, pig farming has an economy of scale; hence, pig farms have grown larger and larger over the past few decades, with a trend toward vertical integration in the industry. The management of health issues in large populations requires a major focus on biosecurity (see Biosecurity). Great efforts are warranted to keep new diseases from entering an immunologically naive population, in addition to programs to restrict the spread of endemic
