Library history without a doubt this is the most important part of low vision i mean
its important to any sort of optometry but in low vision its absolutely central a key
question is whether fluent reading is important

Our Better Vision What People

This means that light-eyed people tend to have slightly better night vision than dark-eyed people. However, darker eyes act like a stronger filter for light, which means that dark-eyed people tend to see better in bright sunlight and are less susceptible to glare. These differences may even go beyond vision abilities.
