Explanation: . The height of the tree requires using trigonometry to solve. The distance of the student to the tree , partial height of the tree , and the distance between the student's eyes to the top of the tree will form the right triangle. The tangent operation will be best used for this scenario, since we have the known distance of the student to the tree, and the partial height of the tree.

### **Trigonometry Practice Questions - Test Preparation**

Balbharati solutions for Maharashtra state board (SSC) 10th Standard Maths 2 Geometry chapter 6 (Trigonometry) include all questions with solution and detail explanation. This will clear students doubts about any question and improve application skills while preparing for board exams.
