### **Veterinary Ophthalmologist | Animal Eye Clinic | UW ...**

Epiphora (eye discharge) is known as a symptom rather than an eye disease. Epiphora in dogs is characterized by continuous tearing. This constant moisture can cause the eye area to swell and become infected. This is commonly considered to be an aesthetic problem, but can also be a symptoms or sign of a foreign object stuck in a dog's eye, which is why veterinary consultation is necessary.

### **Small Animal Ophthalmology - 4th Edition**

Some are small and slow growing, while others may rapidly grow in size. Some lid tumors are not bothersome, while others may rub against and irritate the surface of the eye, or even obstruct vision. Small, slow-growing tumors that do not cause other ocular problems and are not of a type suspected to be malignant often do not need to be removed.
