What Is the Difference Between VMware Horizon and VDI?

Is anyone aware of any vMotion restrictions when it comes to running VDI desktops in Horizon View 6? There is a standing theory at my job that if you vMotion all VDI guests (and any replicas) off a host to put a host into maintenance mode for

patching that you have to put all the VDI guests back to that host to keep Horizon View "happy" especially when it comes time to recompose.

...

VMware Horizon is a commercial desktop and app virtualization product developed by VMware, Inc for Microsoft Windows, Linux and macOS Operating Systems. It was first sold under the name VMware VDM, but with the release of version 3.0.0 in 2008 it was changed to "VMware View". The name was updated to "Horizon View" with the launch of version 6 in April 2014 and is now referred to as "VMware Horizon" to represent desktop and app virtualization.

Bing: Vmware Horizon View 6 Desktop

VMware Horizon 6 enables IT departments to run remote desktops and published applications in the data center, and deliver these desktops and applications to employees as a managed service. End users gain a familiar, personalized environment that they can access from any number of devices anywhere

throughout the enterprise or from home.
