Water Cycle For Kids

Interactive activities about water topics including water cycle, ocean, fresh water, watersheds, water conservation and protection, indirect and direct water use and water and health for elementary and middle school students and their teachers.

Bing: Water Cycle For Kids

Teaching about the water cycle has never been so important. As the planet's temperature increases, the weather changes and our water supply is directly impacted. It's an engaging and meaningful unit. Who knows, one child in your classroom may solve the future's water supply problems.

The Water Cycle for Kindergarten Activities and Lessons ...

The water cycle is the path that all water follows as it moves around Earth in different states. Liquid water is found in oceans, rivers, lakes—and even underground. Solid ice is found in glaciers, snow, and at the North and South Poles. Water vapor—a gas—is found in Earth's atmosphere.

The Water Cycle! | National Geographic Kids

Earth's water is always in movement, and the natural water cycle, also known as the hydrologic cycle, describes the continuous movement of water on, above, and below the surface of the Earth. Water is always changing states between liquid, vapor, and ice, with these processes happening in the blink of an eye and over millions of years.

Water Cycle Worksheets for Kids - Living Life and Learning

The water cycle is the process of water moving around between the air and land.

Or in more scientific terms: the water cycle is the process of water evaporating and condensing on planet Earth in a continuous process. This process has been happening continuously for millions of years and without it, there would be no life on Earth!

What Is the Water Cycle? | NASA Climate Kids

Water on Earth is millions of years old and is constantly being recycled. Water vapor is constantly evaporating from the surface of the Earth. Water vapor in the air condenses to form clouds. Water falls back to earth and the cycle repeats.
