For information on WebFOCUS security authentication and authorization, see the WebFOCUS Security and Administration manual. WebFOCUS Reporting Server User IDs (Back End) The WebFOCUS Reporting Server has both user IDs to run reports and procedures (Execution IDs) and user IDs to administer and start the server (Administrator IDs).

WebFOCUS 8206 PDFs | WebFOCUS KnowledgeBase

Because WebFOCUS creates a new WebFOCUS session on the WebFOCUS Reporting Server each time it submits a request, values for global variables are not retained between report requests. This means that you can use the same global variable in more than one procedure as long as these procedures are called in the same request.

Security and User IDs for WebFOCUS and ReportCaster

This documentation describes WebFOCUS App Studio, a Windows-based GUI development environment for creating WebFOCUS applications. App Studio provides innovative features and functions that simplify development, thereby allowing you to concentrate on interface design, business logic, and data manipulation.
